

<b>Titre de l'annonce</b>	Postdoctoral Fellow in genetic engineering and mouse modeling
<b>3 mots clé -</b>	Epilepsy, Cortical Malformations, mosaicism
<b>Ville</b>	Paris
<b>Pays</b>	France
<b>Texte de l'offre</b>	The main aim of the project is to understand the molecular and cellular bases of focal cortical dysplasia and epileptogenesis. To achieve this, FCD somatic mutations will be introduced in the developing mouse brain to reproduce the disease phenotype, and study the underlying cellular and molecular mechanisms. The successful candidate should be able to use multiple techniques such as genetic engineering and Crispr-editing, in utero electroporation, high-throughput <i>in vivo</i> screening, imaging and single-cell omics.
<b>Date de fin de publication :</b>	01/06/2022
<b>Type d'emploi</b>	Post-Doctorat - Post-Doctoral position
<b>Type de contrat</b>	CDD (36 months Eranet-funded))
<b>Date limite de candidature</b>	01/06/2022
<b>Date début de fonction</b>	01/04/2022
